

A man wearing a white cap and a blue shirt is holding a large bunch of green leafy vegetables, possibly spinach, in front of him. The background is a soft-focus outdoor setting with green foliage.

Love For Life

Action precedes the mind!
The intention should never
be to harm any living thing.

Greed to Accumulate!

- The chase for riches has led to destruction / gradual destruction of our environment! This could be through **FARMING**, mineral exploration, sea activities.
- Through the quest to feed the growing population, the creative human mind has truly become “innovative” in adopting to the trends and changes by coming up with farm inputs to help farmers – some are amazing and other are toxic to human life, living organisms and the environment.

The Common Denominator

- We all eat, We all breath.
- What do we feed our bodies?
- How is it being produced?
- Do our action(s) impact our environment positively or negatively? Do we destroy or build?

What do we EAT?

- We are as good as what we eat.
- The food chain: Eggs, Milk, Meat, Veggies...
- There is a lot of mess going on.
- Why?
- What is your responsibility?
- How can the wrong be changed?

Environmental Leadership.

- Not being swayed by the promise of high yield with the use of any toxic products.
- Taking care of the key fundamental elements – the earth, water, air and space.
- It is our duty to involve our caring responsibility towards the earth.

Religion

- There is no religion to my understanding that advocates for **DESTRUCTION**. Collectively, we only have one place to live, and we cannot isolate ourselves. This beloved place doesn't have spare parts.
- We **MUST** express our **RESPECT** and **ADORATION** for our creation and not just environmental restoration.

What is your ROLE?

Light to Light

Light to Darkness

Darkness to Light
